Summary

I am a Junior Full-Stack Web Developer looking to launch my career in web development as a software engineer at an entry level. I am creative, original, and open to new opportunities. Additionally, I enjoy solving problems, working with others to achieve the same goal, and collaboration. I have been around cameras all my life, and learned photography from my father, a 40 year professional. I also run a freelance photography business in my free time, where I work with clients to achieve their photo or video needs, and doing so while traveling domestically and internationally.

Experience

- | | | |
|----------------|---|-------------------------|
| 1/'20 - Now | Freelance Media | Joe Pa Media |
| | <ul style="list-style-type: none">» Meet with clients and discuss media needs» Collaborate and make client's creative vision come to life» Film, edit, and submit videos to client and work to satisfy their photo/video needs | |
